Sabzevar, Razavi Khorasan, Iran

Summary

Frontend Developer specializing in React and TypeScript, with hands-on experience building responsive web applications and complex product flows. Built four progressively complex portfolio projects spanning a full-stack job board platform, e-commerce, an admin dashboard with role-based access control, and a multi-hotel booking platform. Focused on clean architecture, type-safe development, accessibility, and end-to-end testing.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Router, Vite

Backend & Database: Next.js Server Actions, Prisma ORM, PostgreSQL, Better Auth

State & Data: Zustand, TanStack Query, Context API

Forms & Validation: React Hook Form, Zod

Testing & Tools: Playwright (E2E), Vitest (Unit), Git, GitHub, ESLint

Projects

Jobino — Full-Stack Job Board Platform

Next.js · TypeScript · Prisma · PostgreSQL · Better Auth · Zod · Vitest · Playwright

Built a full-stack job board with separate candidate and employer roles, covering job posting, search/filtering, applications, and resume uploads.

Implemented session-based authentication with Better Auth, role-based authorization, and ownership checks protecting employer and candidate resources.

Designed a relational data model with Prisma and PostgreSQL, enforcing data integrity through both server-side validation and database constraints.

Built a resilient search system with Persian text normalization, and a secure resume upload pipeline using Vercel Blob storage.

Covered core logic and critical user flows with 62 unit tests (Vitest) and an end-to-end Playwright suite spanning the full hiring workflow.

[Live Demo](#) | [GitHub](#)

Stayly — Multi-Hotel Booking Platform

React · TypeScript · Zustand · TanStack Query · React Hook Form · Zod · Playwright

Built a complete multi-step hotel booking flow covering search, room selection, guest information, payment, and confirmation.

Designed a service-layer architecture that centralizes booking and pricing logic and keeps business rules

independent from the UI.

Implemented persistent booking state and protected user data access, ensuring users can only access their own reservations.

Created Playwright E2E tests covering critical booking, payment, and cancellation flows.

Shopino Admin Dashboard — E-commerce Administration

React · TypeScript · Zustand · React Router · TanStack Table · Recharts · Playwright

Implemented a centralized five-level RBAC system with shared access rules across route protection, navigation visibility, and sensitive actions.

Built a centralized routing architecture to keep page routes, access rules, and navigation synchronized.

Developed reusable modules for dashboard analytics, orders, products, customers, and team management.

Built responsive data-driven interfaces with reusable components and type-safe application logic.

[GitHub](#)

TechStore — E-commerce Web Application

React · JavaScript · React Router · Context API · Vite

Built a responsive React e-commerce application with product browsing, shopping cart, discount codes, favorites, reviews, and admin features.

Implemented protected routing with differentiated behavior for unauthenticated and unauthorized users.

Developed product, order, and user management features using reusable React components and Context API.
